Brewer inlet pipe 'Drip Guide' Cino XS PB

This information sheet describes the procedure for installing a drip guide, this prevents any residual liquid from spilling behind and under the drip tray and also leaking beneath the machine.

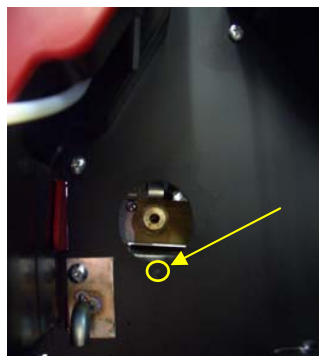

Kit part number: 100558

The Kit Contains:

- 1 x Moulded drip guide
- 1 x brass spacer
- 1 x screw 3.5 x 12mm

1. Loosen and remove the brewer inlet pipe by undoing the knurled thumbwheel.

2. Newer models the hole for the attachment of the drip guide is already pre-drilled. If this is not the case, mark the position using the drip guide and drill with a 3mm drill bit.

3. Fasten the drip guide with the self tapping screw provided as right shown. Make sure that the shim between drip stone and housing wall is installed.

4. Reconnect the brewer inlet pipe using the knurled thumbwheel.
