New Brewer Cleaning Tablets

- For use on all rheavendors servomat bean to cup machines
- Part number (for 1 tub): 799056

Improved brewer cleaning tablets are now available from rheavendors servomat UK.

The improved 'stronger' tablets do not need to be used as often as the old type. We recommend using 1 tablet every 400 selections, this is approximately 1 per week for a Cino XS or Barista PB at their recommended usage rate.

On a daily bases the machines built in brewer cleaning program should still be run without using a tablet.

The new tablets replace the old type and are supplied in tubs of 25 at £6.79 per tub, available individually or in packs of 12 tubs.

If you have any un-used tubs of the old type of tablets return them to rheavendors servomat UK and we will exchange them for the new type.
